Subject: RE: PFAS doc for EC
Attachments: slides for SSWR MIs.pptx

Ann,

I meant to get you this earlier. I want Andy and John to take a look and add to what I have here. In brief I think this is outside of SSWR alone and I think my slides with show why. Later on after some polishing perhaps we can share with the larger. The PFAS have interest and issues in each office, lab and program as I indicated on the slides.

Andy and John please edit as you see fit. I tried to give a big picture for PFAS overlap and I am sure I missed something.

Mark

Subject: PFAS doc for EC

All,

A few weeks ago, I was talking with some of the NERL scientists involved in PFAS research and its potential involvement in the next SSWR RAP. As we discussed it, one suggestion that was made was to see what all the NPDs think about including PFAS related work in the next round of StRAPs. I asked Jennifer Orme-Zavaleta about this and her suggestion was to develop a one pager, describing possible work from an ORD perspective and identify where it might fit in the different program areas. She could then send the document to the Executive Council for discussion.

Attached is what I've put together, with help from Chris Impellitteri. Chris is still reviewing it but since I'll be out of town next week, I wanted to give you all a chance to review and comment now. The goal is to keep it short, so I'm not looking for a lot of additional text, but if there are additional project areas that have been missed please let me know. I do plan to send the more extensive write up we put together this past summer as a background document.

Thanks,
Ann
